SL 57 STEEL

YACHT DESCRIPTION

SL 57 STEEL

2 YEAR BUILD TIME

Creating your perfect superyacht is a journey we'll make together

On the outside, pure lines, elegance, balanced proportions: even from a distance, a Sanlorenzo superyacht is recognizable at first glance. But then there is much more. Once on board, you can breathe in the atmosphere, enjoying the seamless layout, grasping through all your senses the painstaking attention to detail.

On the inside your imagination is your only limitation. Design and commission your very own version of this 57Steel tailored to your specific tastes and requirements.

Made to measure

These yachts offer owners the luxury of spaces that are totally customised in terms of subdivision and furnishings, adapting to personal tastes and passions, precisely like high fashion creations perfectly made to measure. Sanlorenzo knows how to resolve the apparent contradiction of the finest craftsmanship that coexists with the most advanced technology. The Sanlorenzo Yachts philosophy is deeply rooted in every aspect of every fibre in every yacht.

Combining speed, habitability and elegance with cutting-edge innovation, our Steel vessels are our best-selling models. Their unique strength and amenities contribute to an enhanced yachting

lifestyle, making the Steel range a truly incomparable value.
